

Introducing: Koh Rong, Life Beneath the Waves!

Some of you may remember reading in our February issue about our film student, Toby Russell's, production of an educational video for the people of Koh Rong. We are very excited to announce that the film is complete and available to view on our YouTube channel!

Ronan (Project Scientist) and Ben (Field Base Manager) will take the opportunity to present the video to our project partners and the local people at [World Oceans Day](#) on the 8th June. It will then be used as a training aid for local budding conservations! With its Khmer narration and English subtitles it will be accessible for everyone, and will be a fitting legacy for CCC's work in Cambodia.

You can check out the video on YouTube by clicking [here!](#)

Bantay Dagats get ready to snorkel with our instructor and a volunteer!

Our new Field Base Manager arrives on site.

A Long Beaked Coral Butterfly fish- one of many Butterfly fish on CCC's species ID list.

Philippines: After many months of preparation the staff were excited to be able to hold the sites first ever Bantay Dagat training session last month! 'Bantay Dagats' or 'Guards of the Sea' are responsible for maintaining and enforcing Marine Protected Areas. Bantay Dagats from local barangays joined CCC to expand their knowledge of coral reef ecosystems. It was a great opportunity to strengthen the connection between the Bantay Dagat's and their MPAs which they work so hard to protect.

Montserrat: It's a month of new beginnings on the island with the arrival of our new Field Base Manager, Kenny, who is accompanied and assisted by his wife, Anne. Kenny has come to CCC from our sister company [Adventure Lifesigns](#), where he has acted as an expedition leader and worked with students training for their Duke of Edinburgh certificates. As a PADI staff instructor and mountain leader he is prepared for anything that comes up! Now, if only he can use his skills as a ski instructor we'll be really impressed!

Cambodia: With Cambodia's first large scale Marine Fisheries Management Area (MFMA) soon to be announced CCC are working hard to ensure that there are people with the skills to continue surveying once we leave. We were recently joined by 12 members of the Fisheries Administration (FiA) who undertook a condensed version of our [Skills Development Program](#), learning all about marine ecology, surveying and species ID. With such eager and attentive students we feel confident that the MFMA will be a great success.

Offer of the Month!

Building on last month's special offer... [book on](#) for at least 12 weeks and get your **Dive Master** course (usually £350) for **free!** Just mention 'May Offer' on your booking form. NB. Only available to those who have purchased a Rescue Diver course. Cannot be combined with any other special offers. Offer expires on the 16th June 2014.
